

## Mover

1 door vertical sliding system

- Frictional opening and closing
- Standard length available > **1200/ 1800/ 2400mm**
- Door Height > **600mm**
- Door Thickness > **20mm**
- Thickness of door panel > **18mm - 45mm**

MOVER is a sliding system with vertical gliding for wall cabinets and small cabinets in general. It updates the sliding mechanisms in this category, eliminating the double side panels and counterweights. The sliding mechanism is concealed inside an aluminium profile always hidden from the door. The door moves on two lateral telescopic guides and can be stopped in any position.
