versahit mono

versahit is a **compact and versatile power system**. Designed with a 'slim profile' and with easy installation from above, versahit is suitable for many different environments such as **kitchens, bedrooms, living rooms** and **offices**.

Designed with **one independent button**, versahit allows individual use of electrical sockets, with enhanced clean lines and safety Features. The opening system operates in **two stages**: by pushing one button, the cover slide opening the socket – then the socket is fully opened manually.

VersaHit is a product designed to fit small spaces, in particular it has been designed for 40 mm kitchen worktops, offering also water protection with **IP54 protection rate**.

versahit is also available in the **"combi" version**, which allows you to have two side by side in a single frame.

versahit is also available in the configuration with USB chargers, very useful for recharging smartphones, tablets and small accessories
