

- **Evolution** is a system that allows the **extraction of a medium or large table from a cabinet**.
- In its standard version, **Evolution** uses the door of the furniture composition for its opening. A **Naked version** is also available, which **allows the installation in a piece of furniture with no closing door** (such as monobloc kitchens with recessed doors).
- The mechanism is supplied complete with a **steel bridge leg with two ground wheels adjustable by 25 mm in height**.
- The **medium 1040 mm version** requires the use of 2 wooden tops, while the large **XL version (1520mm)** requires the use of 3 wooden tops.

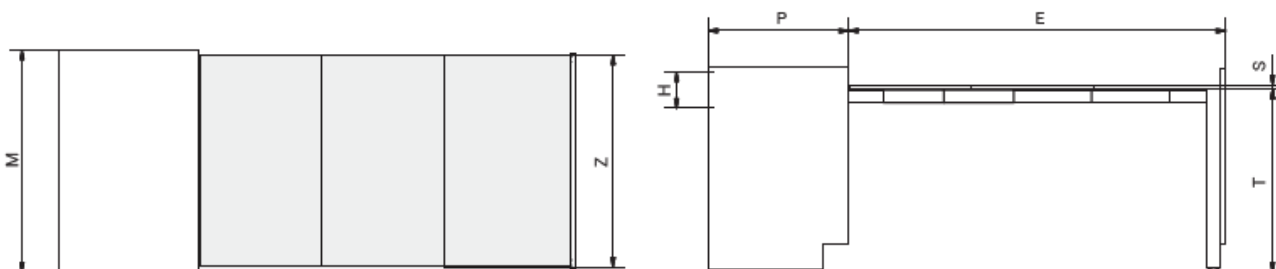

- Technical
