

- Torsion-resistant design
- Spring-retention back pressure shutters
- Bore Ø > 150mm
- Variable connector depth > 90/ 120/ 145mm

402.2.019

E-Jal Blow External Blind
External stainless-steel blind 190 x 190 mm with back pressure shutter and fly screen for connection to round pipes.

402.2.012

E-Jal External blind
External stainless-steel blind with back pressure shutter for connection to round pipes.

402.2.038

E-Jal Flow 150 External Blind
290 x 160 mm with back pressure shutter for connection 222 x 89 mm to COMPAIR® flow 150.

Mounted in a suitable position on the outside wall. Waste air from the waste air hood, from your dryer or air-conditioning duct through a connector to a hose or pipe system to the environment. Frame element of torsion-resistant design shows no deformation even after long-term use and weathering. Stainless steel external blinds in lamella design with spring-retention back pressure shutters prevent the penetration of strong wind and driving rain.
