

VersaTURN 3.0

Electrical and data connection module

- top-of-the-range electrification system designed by ASA.
- The clean and elegant design, the quality of the materials and the hidden rotation make it a one-of-a-kind recessed power strip, adding originality and class to every environment.
- VersaTurn 3.0 was specifically designed for meeting rooms and executive desktops. It provides the option to conceal the sockets when they are not needed, utilizing motorized rotation via a touch sensor that is seamlessly integrated into the upper part.
